PROF. S. H. DAVIS (*Johns Hopkins*), DR M. E. McINTYRE (*Cambridge*)

Authors wishing to have papers published in the JOURNAL should communicate them to any Editor or Associate Editor named above, choosing one in their own country where possible.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published twice a month. Single parts £2.50 net ($7.50 in the U.S.A.) plus postage. Four parts form a volume. The subscription price of a volume (which includes postage) is £8.00 net ($25.00 in the U.S.A.).

Copies of the journal for subscribers in the United States of America are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y.

Claims for missing issues will be considered only if made after receipt of the subsequent issue.

CONTENTS TO VOLUME 48

Part 1 12 July 1971

The development of concentrated vortices: a numerical study. L. M. Leslie *page* 1

A solution for hypersonic flow past slender bodies. W. H. Hui 23

The effect of laminar viscosity on the solution of the undular bore. J. G. B. Byatt-Smith 33

Some measurements of particle velocity autocorrelation functions in a turbulent flow. W. H. Snyder and J. L. Lumley 41

Vortex shedding from a turbulent jet in a cross-wind. H. M. McMahon, D. D. Hester and J. G. Palfery 73

Long waves generated by ground motion. Montgomery W. Slatkin 81

Measurements of atmospheric pressure on wind-generated sea waves. Fred W. Dobson 91

Magneto-fluid-mechanic pipe flow in a transverse magnetic field. Part 2. Heat transfer. R. A. Gardner and P. S. Lykoudis 129

The stability of immiscible liquid layers in a porous medium. R. Raghavan and S. S. Marsden 143

A limitation on Long's model in stratified fluid flows. Harvey Segur 161

A note on the role of the buoyancy layer in a rotating stratified fluid. J. Pedlosky 181

Statistical properties of velocity derivatives in a turbulent field. François N. Frenkiel and Philip S. Klebanoff 183

Part 2 28 July 1971

On laminar boundary-layer blow-off. Part 2. D. R. Kassoy 209

The drag on oscillating flat plates in liquids at low Reynolds numbers. Cornelius C. Shih and Harry J. Buchanan 229

On the reattachment of a shock layer produced by an instantaneous energy release. H. K. Cheng, J. W. Kirsch and R. S. Lee 241

Transition to a wavy vortex régime in convective flow between inclined plates. J. E. Hart 265

Simple Eulerian time correlation of full- and narrow-band velocity signals in grid-generated, 'isotropic' turbulence. Geneviève Comte-Bellot and Stanley Corrsin 273

The 'bursting' phenomenon in a turbulent boundary layer. K. Narahari Rao, R. Narasimha and M. A. Badri Narayanan *page* 339

Sting-free drag measurements on ellipsoidal cylinders at transition Reynolds numbers. M. Judd, M. Vlajinac and E. E. Covert 353

Stability of time-dependent rotational Couette flow. Part 2. Stability analysis. C. F. Chen and R. P. Kirchner 365

Third-harmonic resonance in the interaction of capillary and gravity waves. Ali Hasan Nayfeh 385

On the determination of the zones of influence and dependence for three-dimensional boundary-layer equations. K. C. Wang 397

Inviscid instability of an unbounded heterogeneous shear layer. S. A. Maslowe and R. E. Kelly 405

Review

Differential and Integral Inequalities, by W. Walter 416

Part 3 16 August 1971

Experiments on laminar flow in curved channels of square section. J. A. Baylis 417

MHD flow in an annular channel; theory and experiment. J. A. Baylis and J. C. R. Hunt 423

Magnetohydrodynamic duct flow in a uniform transverse magnetic field of arbitrary orientation. C. J. N. Alty 429

The method of multiple scales and non-linear dispersive waves. Ali Hasan Nayfeh and Sayed D. Hassan 463

The determination of the rate of dissipation in turbulent pipe flow. C. J. Lawn 477

On the phenomenon of vortex street breakdown. William W. Durgin and Sture K. F. Karlsson 507

A non-linear instability theory for a wave system in plane Poiseuille flow. K. Stewartson and J. T. Stuart 529

Orderly structure in jet turbulence. S. C. Crow and F. H. Champagne 547

Aerodynamic noise. M. J. Fisher and M. V. Lowson 593

Centrifugal convection and its effect on the asymptotic stability of a bounded rotating fluid heated from below. G. M. Homsy and J. L. Hudson 605

PART 4 27 AUGUST 1971

Stability of vertical natural convection boundary layers: some numerical solutions. C. A. HIEBER and B. GEBHART *page* 625

Contained non-homogeneous flow under gravity or how to stratify a fluid in the laboratory. GÖSTA WALIN 647

The Rayleigh problem for a slightly diffusive density-stratified fluid. R. G. STANDING 673

On the interpretation of some longitudinal dispersion experiments. P. C. CHATWIN 689

Convection experiments with electrolytically heated fluid layers. E. W. SCHWIDERSKI and H. J. A. SCHWAB 703

The response of a turbulent boundary layer to a step change in surface roughness. Part 1. Smooth to rough. R. A. ANTONIA and R. E. LUXTON 721

The effect of velocity sensitivity on temperature derivative statistics in isotropic turbulence. J. C. WYNGAARD 763

Calculation of the steady flow past a sphere at low and moderate Reynolds numbers. S. C. R. DENNIS and J. D. A. WALKER 771

Upstream boundary-layer separation in stratified flow. JOHN W. MILES 791

Thermally-driven linear vortex. S. BLUMSACK and A. BARCILON 801

Electrohydrodynamic stability: effects of charge relaxation at the interface of a liquid jet. D. A. SAVILLE 815

Strömungslehre, vol. 2, by O. Tietjens 828

INDEX TO VOLUME 48 830

JOURNAL OF FLUID MECHANICS

The JOURNAL OF FLUID MECHANICS exists for the publication of theoretical and experimental investigations of all aspects of the mechanics of fluids.

EDITORS

PROF. G. K. BATCHELOR, DR H. K. MOFFATT

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England

ASSOCIATE EDITORS

PROF. G. F. CARRIER, *Pierce Hall, Harvard University, Cambridge, Massachusetts* 02138, *U.S.A.*

DR W. C. GRIFFITH, *Building* 102, *Plant* 1, *Lockheed Missiles and Space Company, P.O. Box* 504, *Sunnyvale, California* 94088, *U.S.A.*

PROF. M. J. LIGHTHILL, *Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB* 3 9*EW, England*

PROF. J. W. MILES, *Institute of Geophysics and Planetary Physics, University of California, La Jolla, California* 92038, *U.S.A.*

PROF. O. M. PHILLIPS, *Department of Mechanics, The Johns Hopkins University, Baltimore, Maryland* 21218, *U.S.A.*

PROF. L. E. SCRIVEN, *Department of Chemical Engineering and Materials Science, University of Minnesota, Minneapolis, Minnesota* 55455, *U.S.A.*

ASSISTANT EDITORS

DR M. D. COWLEY (*Cambridge*), PROF. S. H. DAVIS (*Johns Hopkins*)
DR H. E. HUPPERT (*Cambridge*), DR M. E. McINTYRE (*Cambridge*)

Authors wishing to have papers published in the JOURNAL should communicate them to any Editor or Associate Editor named above, choosing one in their own country where possible.

Authors are urged to write their papers clearly and attractively, in order to ensure that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 40 cm by 60 cm. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The JOURNAL OF FLUID MECHANICS is published twice a month. Single parts £2.50 net ($7.50 in the U.S.A.) plus postage. Four parts form a volume. The subscription price of a volume (which includes postage) is £8.00 net ($25.00 in the U.S.A.).

Copies of the journal for subscribers in the United States of America are sent by air to New York to arrive with the minimum delay. Second class postage is paid at New York, N.Y.

Claims for missing issues will be considered only if made after receipt of the subsequent issue.

CONTENTS TO VOLUME 49

Part 1 13 September 1971

Generation of surf beat by non-linear wave interactions. Brent Gallagher *page* 1

Hydromagnetic instability of a free shear layer at small magnetic Reynolds numbers. Kanefusa Gotoh 21

The effect of sinusoidal protrusions on laminar free convection between vertical walls. A. Watson and G. Poots 33

Bed forms due to mass transfer in turbulent flows: a kaleidoscope of phenomena. J. R. L. Allen 49

Transmission of water waves through small apertures. E. O. Tuck 65

Numerical simulation of incompressible flows within simple boundaries: accuracy. Steven A. Orszag 75

The reflexion of internal/inertial waves from bumpy surfaces. Part 2. Split reflexion and diffraction. P. G. Baines 113

Swirling flow boundary layers. G. F. Carrier 133

The intensification of hurricanes. G. F. Carrier 145

A theory for the laminar wake of a two-dimensional body in a boundary layer. J. C. R. Hunt 159

Free-surface gravity flow past a submerged cylinder. G. Dagan 179

Thermal convection in a horizontal plane Couette flow. Robert P. Davies-Jones 193

Reviews

Mécanique des Milieux Continus, by J. Mandel 206

Mécanique des Milieux Deformables, by G. Gontier 206

Part 2 29 September 1971

Infinite models for ciliary propulsion. J. R. Blake 209

Cavity-flow wall effects and correction rules. T. Yao-Tsu Wu, Arthur K. Whitney and Christopher Brennen 223

The dynamics of a deformable drop suspended in an unbounded Stokes flow. S. Haber and G. Hetsroni 257

On sideways diffusive instability. J. E. Hart 279

Viscous incompressible flow between concentric rotating spheres. Part 1. Basic flow. B. R. Munson and D. D. Joseph *page* 289

Viscous incompressible flow between concentric rotating spheres. Part 2. Hydrodynamic stability. B. R. Munson and D. D. Joseph 305

A model for the boundary condition of a porous material. Part 1. G. I. Taylor 319

A model for the boundary condition of a porous material. Part 2. S. Richardson 327

Rotational temperature profiles of shock waves in diatomic gases. A. K. Macpherson 337

A ship's waves and its wake. D. H. Peregrine 353

Instability and breakup of charged liquid jets. A. L. Huebner and H. N. Chu 361

Upstream influence in a two-fluid system. G. Keady 373

On an invariant property of water waves. T. Brooke Benjamin and J. J. Mahony 385

Finite-amplitude and diffusive effects in acoustics: a report on EUROMECH 23. N. Rott and H. Thomann 391

On combustion generated noise. Warren C. Strahle 399

Review

Annual Review of Fluid Mechanics, Volume 2, edited by M. Van Dyke, G. Vincenti and J. V. Wehausen 415

Part 3 15 October 1971

Baroclinic annulus waves. Gareth P. Williams 417

Low Reynolds number flow in slowly varying axisymmetric tubes. M. J. Manton 451

An experimental study of peristaltic pumping. S. L. Weinberg, E. C. Eckstein and A. H. Shapiro 461

A note on theoretical acoustical sources in motion. E. W. Graham and B. B. Graham 481

Statistical hydromechanics of disperse systems. Part 1. Physical background and general equations. Yu. A. Buyevich 489

Selective withdrawal in rotating fluids. Hsing-Hua Shih and Hsien-Ping Pao 509

On stability of Taylor vortices by fifth-order amplitude expansions. P. M. Eagles 529

Longitudinal dispersion within a two-dimensional turbulent shear flow. PAUL J. SULLIVAN *page* 551

Stability of vertical natural convection boundary layers: expansions at large Prandtl number. C. A. HIEBER and B. GEBHART 577

Semidispersive wave systems. ALAN C. NEWELL and P. J. AUCOIN 593

Salt fingers in the presence of grid-generated turbulence. P. F. LINDEN 611

PART 4 29 OCTOBER 1971

An integral equation for unsteady surface waves and a comment on the Boussinesq equation. J. G. B. BYATT-SMITH 625

An experimental investigation of turbulent stratified shearing flow. MICHAEL J. MOORE and ROBERT R. LONG 635

A pulsed-wire technique for velocity measurements in highly turbulent flows. L. J. S. BRADBURY and I. P. CASTRO 657

Effect of a non-uniform alternating electric field on the thermal boundary layer near a heated vertical plate. ROBERT J. TURNBULL 693

Non-linear wave-number interaction in near-critical two-dimensional flows. R. C. DIPRIMA, W. ECKHAUS and L. A. SEGEL 705

On geostrophic motion of a non-homogeneous fluid. R. HIDE 745

Spin-down of a Boussinesq fluid of small Prandtl number in a circular cylinder. TAKEO SAKURAI, ALFRED CLARK and PATRICIA A. CLARK 753

The propagation of large amplitude tsunamis across a basin of changing depth. Part 1. Off-shore behaviour. E. VARLEY, R. VENKATARAMAN and E. CUMBERBATCH 775

Aerodynamic excitation of the harmonium reed. ARTHUR O. ST HILAIRE, THEODORE A. WILSON and GORDON S. BEAVERS 803

Generation of fluid motion in a circular cylinder by an unsteady applied magnetic field. ALFRED SNEYD 817

CONTENTS TO VOLUME 50

Part 1 15 November 1971

Unsteady multicellular viscous vortices. P. G. Bellamy-Knights *page* 1

Real-gas effects in very weak shock waves in the atmosphere and the structure of sonic bangs. J. P. Hodgson and N. H. Johannesen 17

On the noise sources of the unsuppressed high-speed jet. K. A. Bishop, J. E. Ffowcs Williams and W. Smith 21

Unsteady viscous flow over a wavy wall. W. H. Lyne 33

The near field within the potential cone of subsonic cold jets. N. W. M. Ko and P. O. A. L. Davies 49

Rotating flow over shallow topographies. Arsalan Vaziri and Don L. Boyer 79

The flow due to an oscillating piston in a cylindrical tube: a comparison between experiment and a simple entrance flow theory. J. H. Gerrard and M. D. Hughes 97

Weak quadratic interactions of two-dimensional waves. Young Yuel Kim and Thomas J. Hanratty 107

The production of turbulence near a smooth wall in a turbulent boundary layer. H. T. Kim, S. J. Kline and W. C. Reynolds 133

Non-linear effects in steady supersonic dissipative gasdynamics. Part 1. Two-dimensional flow. T. H. Chong and L. Sirovich 161

An Oseen model of the two-dimensional flow of a stratified fluid over an obstacle. Kathleen Trustrum 177

On the mass and momentum transfer between short gravity waves and larger-scale motions. K. Hasselmann 189

Review

Heat and Mass Transfer in Boundary Layers, 2nd edition, by S. V. Patankar and D. B. Spalding 206

Part 2 29 November 1971

Velocity measurements in regions of upstream influence of a body in aligned-fields MHD flow. Bruce M. Lake 209

Structural features of turbulent flow over smooth and rough boundaries. A. J. Grass 233

The determination of the Kolmogoroff constants for velocity, temperature and humidity fluctuations from second- and third-order structure functions. J. E. Paquin and S. Pond 257

On the initial-value problem in the kinetic theory of gases. HOWARD R. BAUM *page* 271

Experiments on internal intermittency and fine-structure distribution functions in fully turbulent fluid. ALBERT YI-SHUONG KUO and STANLEY CORRSIN 285

Effects of plane progressive irrotational waves on thermal boundary layers. JAMES WITTING 321

Slender-body analysis of the motion and stability of a vortex filament containing an axial flow. SHEILA E. WIDNALL and DONALD B. BLISS 335

On the decay of weak shock waves in axisymmetric non-equilibrium flow. DAVID C. CHOU and BOA-TEH CHU 355

Displacement and curvature effects in a wall jet. ANN L. CLARK and E. J. WATSON 369

Non-linear resonant instability in boundary layers. ALEX D. D. CRAIK 393

REVIEWS

The Particle Kinetics of Plasmas, by I. P. Shkarofsky, T. W. Johnston and M. P. Bachynski 414

Sources of Plasma Physics, by H. S. Green and R. B. Leipnik 414

Aerodynamics of Bodies of Revolution, by N. F. Krasnov 415

Mechanics of Fluids, 2nd edition (S.I. units), by W. J. Duncan, A. S. Thom and A. D. Young 416

PART 3 14 DECEMBER 1971

The stability of a water drop oscillating with finite amplitude in an electric field. P. R. BRAZIER-SMITH 417

Degeneration of resonantly-excited standing internal gravity waves. A. D. MCEWAN 431

On hydromagnetic oscillations in a rotating cavity. ROGER F. GANS 449

The determination of the interfacial tension between two liquids. JEROME H. MILGRAM and ROBERT G. BRADLEY 469

Irrotational flow past bodies close to a plane surface. E. O. TUCK 481

Spatial structure in the viscous sublayer. A. K. GUPTA, J. LAUFER and R. E. KAPLAN 493

Autorotating wings: and experimental investigation. E. H. SMITH 513

A new type of water channel with density stratification. GARRETT M. ODELL and LESLIE G. KOVASZNAY 535

A non-linear investigation of critical levels for internal atmospheric gravity waves. R. J. BREEDING 545

Nearly free-molecular slit flow at finite pressure and temperature ratios. P. Y. WANG and E. Y. YU 565

Spin-up of a stratified fluid: theory and experiment. GEORGE BUZYNA and GEORGE VERONIS *page* 579

Hydromagnetic spin-up of a fluid confined by two flat electrically conducting boundaries. DAVID E. LOPER 609

PART 4 29 DECEMBER 1971

The stability of unsteady axisymmetric incompressible pipe flow close to a piston. Part 1. Numerical analysis. J. H. GERRARD 625

The stability of unsteady axisymmetric incompressible pipe flow close to a piston. Part 2. Experimental investigation and comparison with computation. M. D. HUGHES and J. H. GERRARD 645

An exact periodic solution of the energy equation. HIROSHI ISHIGAKI 657

Blast wave propagation in an inhomogeneous atmosphere. P. L. SACHDEV 669

Rotating flow over a step. DON L. BOYER 675

Accurate solution of the Orr–Sommerfeld stability equation. STEVEN A. ORSZAG 689

A new technique for treating multiparticle slow viscous flow: axisymmetric flow past spheres and spheroids. MICHAEL J. GLUCKMAN, ROBERT PFEFFER and SHELDON WEINBAUM 705

The effect of main flow transverse velocities in linear stability theory. T. S. CHEN, E. M. SPARROW and F. K. TSOU 741

The spacing, position and strength of vortices in the wake of slender cylindrical bodies at large incidence. K. D. THOMSON and D. F. MORRISON 751

A numerical investigation into the effects of compressibility and total enthalpy difference on the development of a laminar free shear layer. PETER W. CARPENTER 785

Numerical solutions for steady symmetric viscous flow past a parabolic cylinder in a uniform stream. S. C. R. DENNIS and J. D. WALSH 801

Vibration of hot-wire anemometer filaments. A. E. PERRY and G. L. MORRISON 815
